Notes to the Interim Consolidated Financial Statements

(Unaudited – Prepared by Management)
(Stated in Canadian Dollars Unless Noted Otherwise)

1. Nature of Operations and Going Concern

Rokmaster Resources Corp. (the “Company” or “Rokmaster”) was incorporated on December 21, 2010 under the Business Corporations Act (British Columbia). The Company is listed on the TSX Venture Exchange (“TSX.V”) under the symbol “RKR”, on the OTCQB in the USA under the symbol “RKMSF” and on the Frankfurt Stock Exchange under the symbol “1RR1.” The Company’s head office, principal address and records office is located at 615 – 625 Howe Street, Vancouver, British Columbia, Canada V6C 2T6. The Company’s registered address is located at Suite 2300, Bentall 5, 550 Burrard Street, Vancouver, British Columbia, Canada V6C 2B5. Rokmaster is primarily engaged in the acquisition of mineral resource properties and the exploration and development of such properties for minerals. Minerals of interest to the Company include precious metals, base metals and industrial minerals.

These condensed interim consolidated financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations, and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred losses since inception, has no recurring source of revenue, has an accumulated deficit of \$27,257,857 and a working capital of \$423,847 at June 30, 2022. These material uncertainties cast significant doubt upon the Company’s ability to continue as a going concern.

The Company will need to raise sufficient funds as the Company’s current assets are not sufficient to finance its operations and administrative expenses. The Company is evaluating financing options including, but not limited to, the issuance of additional equity and debt. The Company has no assurance that such financing will be available or be available on favourable terms. Factors that could affect the availability of financing include the Company’s performance (as measured by numerous factors including the progress and results of its projects), the state of international debt and equity markets, investor perceptions and expectations and the global financial and metals markets.

During 2020, the World Health Organization declared a global pandemic known as COVID-19 and governments around the world enacted measures to combat the spread of the virus. The duration and impact of the COVID-19 outbreak is not known at this time, but the risks to the Company may include, but are not limited to, delays in the previously disclosed timelines and activity levels associated with the Company’s operations and the ability to raise funds through debt and equity markets. To date the Company’s operations and ability to raise funds have not been significantly impacted by COVID-19.

These condensed interim consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

2. Basis of Presentation

a. Statement of Compliance

These condensed interim consolidated financial statements were prepared in accordance with International Accounting Standards 34, Interim Financial Reporting (“IAS 34”), using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

2. Basis of Presentation - *Continued*

a. Statement of Compliance - *Continued*

The accounting policies and methods of application applied by the Company in these condensed interim consolidated financial statements are the same as those applied in the Company's most recent annual consolidated financial statements as at and for the year ended December 31, 2021, except for those policies which have changed as a result of the adoption of new and amended IFRS pronouncements effective January 1, 2022.

These condensed interim consolidated financial statements do not include all of the information required for full annual financial statements and therefore should be read in conjunction with the Company's most recent annual consolidated financial statements as at and for the year ended December 31, 2021. The effects of the adoption of new and amended IFRS pronouncements have been disclosed in Note 3 of these condensed interim consolidated financial statements.

b. Approval of the Financial Statements

The condensed interim consolidated financial statements of Rokmaster for the six months ended June 30, 2022 were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on August 29, 2022.

3. New, Amended and Future IFRS Pronouncements

IAS 1 – Presentation of Financial Statements

An amendment to IAS 1 was issued in January 2020 and applies to annual reporting periods beginning on or after January 1, 2022. The amendment clarifies the criterion for classifying a liability as non-current relating to the right to defer settlement of a liability for at least 12 months after the reporting period.

The Company adopted IAS 1 effective January 1, 2022 and the adoption had no impact on the Company's results of operations, financial position, and disclosures.

4. Critical Accounting Estimates and Judgments

The preparation of financial statements requires management to use judgment in applying its accounting policies and estimates and assumptions about the future. Estimates and other judgments are continuously evaluated and are based on management's experience and other factors, including expectations about future events that are believed to be reasonable under the circumstances. The following discusses the most significant accounting judgments and estimates that the Company has made in these financial statements.

Carrying Value of Deferred Mineral Interests

The Company has capitalized the cost of acquiring mineral property interests and has classified these interests as mineral interests in its statement of financial position. Mineral interests are expensed in the period in which the Company determines that the mineral property interests have no future economic value. Mineral interests may also be written down if future cash flow, including potential sales proceeds and option payments, related to the property are estimated to be less than the carrying value of the property. The Company reviews the carrying value of its mineral interests periodically, and whenever events or changes in circumstances indicate that the carrying value may not be recoverable, reductions in the carrying value of each property would be recorded to the extent that the carrying value of the investment exceeds the property's estimated fair value. Such events or changes in circumstances involve changes in political risk, economic risk, commodity prices, exchange rates, and interest rates among others.

The Company has determined that there is no impairment in the carrying value of the Big Copper, Duncan Lake and Revel Ridge properties.

Deferred Tax Assets

Deferred income tax asset carrying amounts depend on estimates of future taxable income and the likelihood of reversal of timing differences. Where reversals are expected, estimates of future tax rates will be used in the calculation of deferred tax asset carrying amounts. Potential tax assets were deemed not to be recoverable at the current year end.

Going Concern

Management assesses the Company's ability to continue as a going concern in relation to its ability to raise funds.

6. Reclamation Bond

As at June 30, 2022, the Company had deposited \$3,500 (December 31, 2021 - \$3,500) into a guaranteed investment certificate (GIC) with a Canadian financial institution as part of a Safe Keeping Agreement entered into by the Company for the Big Copper Property. The GIC is being held to the order of the B.C. Ministry of Energy and Mines (the “BC MEM”) and yields an annual interest rate of 0.90%.

The Company also provided the BC MEM reclamation bonds of \$21,500 (December 31, 2021 - \$21,500) with respect to the Duncan Lake Zinc-Lead Project and \$39,750 (December 31, 2021 - \$39,750) with respect to the Revel Ridge Project.

c. Revel Ridge Project, Canada

On February 24, 2020, the Company received TSX.V approval of its definitive option agreement (the “Option Agreement”) dated December 23, 2019 with Huakan International Mining Inc. (“Huakan”) and Huakan’s shareholders pursuant to which Huakan has granted to the Company an option (the “Option”) to acquire a 100% interest in Huakan’s J&L Property in southeastern British Columbia (the “Property”).

The Company can exercise the Option by paying Huakan an aggregate of \$44,200,000 in cash on the following schedule (the “Option Period”):

1. \$200,000 (paid) within 5 business days of the date on which the Company has obtained TSX.V acceptance of the Option Agreement (the “Effective Date”);
2. an additional \$1,000,000 (paid) within 5 business days of the first anniversary of the Effective Date;
3. an additional \$4,000,000 (paid) within 5 business days of the second anniversary of the Effective Date;
4. an additional \$6,000,000 within 5 business days of the third anniversary of the Effective Date;
5. an additional \$13,000,000 within 5 business days of the fourth anniversary of the Effective Date; and
6. an additional \$20,000,000 within 5 business days of the fifth anniversary of the Effective Date.

A finder's fee equal to 3% of the value of any cash payment made by the Company to Huakan pursuant to the Option Agreement is payable in cash or shares of the Company, at the Company's option. During the period ended June 30, 2022, the Company issued 521,739 shares valued at \$117,391 (December 31, 2021 – nil) and paid cash of \$nil (December 31, 2021 - \$30,000) to the finder.

7. Mineral Interests - Continued

d. Duncan Lake Zinc-Lead Property, Canada

On January 17, 2017, the Company completed its acquisition of a 100% interest in the Duncan Lake Zinc-Lead Property located in the Slocan Mining Division in southeast British Columbia, Canada (the “Property” or “Duncan Lake”) approximately 64 km north of Kaslo, British Columbia (the “Acquisition”), pursuant to a property purchase agreement dated November 2, 2016 (the “Purchase Agreement”) with John (Jack) Denny, Robert Denny and Graeme Haines (collectively, the “Sellers”). The Property consists of nine contiguous mineral claims covering 1,648 hectares along the strike extension of Teck Resources Ltd.’s (“Teck”) historical Duncan Mine property and is 148 km by road northeast of Teck’s smelter in Trail, British Columbia.

Under the Purchase Agreement, Rokmaster provided the following aggregate consideration to the Sellers at closing in exchange for the Property:

- an aggregate of 2,400,000 common shares of the Company (“Common Shares”) were issued on the date of closing of the Acquisition;
- an aggregate of 2,400,000 Series A Special Warrants that have a term of 10 years, with each Series A Special Warrant being automatically exercised into one Common Share upon the Company receiving a technical report identifying a mineral resource or mineral reserve estimate totalling a minimum of 3 million tonnes of 6% combined lead and zinc equivalent;
- an aggregate of 2,400,000 Series B Special Warrants that have a term of 15 years, with each Series B Special Warrant being automatically exercised into one Common Share upon the Company receiving a technical report identifying a mineral resource or mineral reserve estimate totalling a minimum of 6 million tonnes of 6% combined lead and zinc equivalent;
- an aggregate of 2,400,000 Series C Special Warrants that have a term of 20 years, with each Series C Special Warrant being automatically exercised into one Common Share once the Property commences commercial production; and
- a 2.5% net smelter returns royalty on gold, silver, lead and zinc bearing ores produced from the Property. The Company has the option to reduce the existing NSR of 2.5% to 0.5% by making cash payments of \$1,200,000 for each 1% increment at any time.

All of the aforementioned Special Warrants (the “Special Warrants”) are subject to an accelerated exercise provision that would result in the Special Warrants being exercised automatically into Common Shares if and when there is:

(a) a consolidation, amalgamation, merger or take-over of the Company with, into or by another body corporate that results in the acquisition of at least 66 2/3 of the issued and outstanding shares of the Company for cash consideration, or if for non-cash consideration, as long as the acquisition price is at least a 25% premium to the volume weighted average trading price of the Company’s shares on the TSXV for the five consecutive trading days ending on the trading day prior to the first public announcement of such consolidation, amalgamation merger or take-over; or

(b) a transfer of the undertaking or assets of Rokmaster as an entirety or substantially as an entirety to another corporation or entity that is subject to shareholder approval of Rokmaster.

7. Mineral Interests - Continued

d. Duncan Lake Zinc-Lead Property, Canada - Continued

In the case of the Series C Special Warrants, if any of the aforementioned events occurred within 10 years from the date of issue thereof, only an aggregate of 1.2 million Common Shares would be issued to the holders of the Series C Special Warrants upon exercise thereof. On March 3, 2017, the Company completed its acquisition of a 100% interest in a certain British Columbia Mineral Tenure located in the Slocan Mining Division by issuing 50,000 Rokmaster common shares. The mineral claim adjoins the Duncan Lake Zinc Project.

On September 20, 2017, the Company entered into a Property Purchase Agreement (the “PPA”), to acquire a 100% interest in 11 mineral claims totaling 620 hectares by issuing 90,000 Rokmaster common shares and a 2.5% Net Smelter Return Royalty (“NSR”) in favor of the arms-length seller. The NSR is subject to a buy-back provision providing the Company with the exclusive option, at any time if it so chooses, to purchase 1% NSR upon payment of \$500,000 and the remaining balance of 1.5% NSR upon payment of an additional \$500,000. The mineral claims are south of and adjacent to the Company’s Duncan Lake Zinc Project.

e. Big Copper Property, Canada

On February 16, 2012, the Company entered into an Option Agreement (the “Big Copper Option”) to earn a 100% undivided interest in certain mining claims, more particularly known as the Big Copper Property (“Big Copper”). Big Copper is located in the Fort Steele and Slocan Mining Divisions, British Columbia, Canada. To earn a 100% interest in Big Copper, the Company may, at its option, pay the following aggregate consideration over three years: paid \$45,000 in total cash payments and issued 40,000 common shares in total (fair value - \$24,500). On September 30, 2015, the parties mutually terminated the Big Copper Option and agreed to have the following share ownership to the Big Copper Property: 55% to Rokmaster and 45% to the vendors.

f. Other Properties

The Company incurs exploration and evaluation expenditures in assessing the suitability of properties available for option or acquisition within North America and Latin America. The beginning balance in the schedule includes past projects written-off or terminated by the Company.

As at June 30, 2022, the Company has no other options to acquire interests in any mineral properties.

Compensation of Key Management Personnel

Key management personnel are those persons that have authority and responsibility for planning, directing and controlling the activities of the Company, directly and indirectly, and by definition include the directors of the Company.

The remuneration of the Company's key management personnel for the six months ended June 30, 2022 and 2021 are as follows:

	Notes	June 30, 2021	June 30, 2021
Management, director and geological consulting fees	(i)	\$ 273,823	\$ 219,450
Share-based Compensation	(ii)	438,566	-
Total		\$ 712,389	\$ 219,450

- (i) Management, director and geological consulting fees include those disclosed in the table above.
- (ii) Share-based compensation is the fair value, using the Black-Scholes option pricing model, of the options granted and vested to key management.

Key management personnel were not entitled to post-employment, termination or other long-term benefits during the six months ended June 30, 2022 and 2021.

The above transactions occurred in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the parties.

11. Capital Management

The Company primarily considers shareholders' equity in the management of its capital. The Company manages its capital structure and makes adjustments to it based on funds available to the Company, in order to support exploration and development of mineral properties. The Board of Directors has not established quantitative capital structure criteria management, but will review on a regular basis the capital structure of the Company to ensure its appropriateness to the stage of development of the business.

The Company's objectives when managing capital are:

- To maintain and safeguard its accumulated capital in order to provide an adequate return to shareholders by maintaining sufficient level of funds, to support continued evaluation and maintenance of the Company's existing properties, and to acquire, explore and develop other precious metals, base metals and industrial mineral deposits;
- To invest cash on hand in highly liquid and highly rated financial instruments with high credit quality issuers, thereby minimizing the risk and loss of principal; and
- To obtain the necessary financing if and when it is required.

The properties in which the Company currently holds interests are in the exploration stage and the Company is dependent on external financing to explore and take the projects to development. In order to carry out planned exploration and development and pay for administrative costs, the Company will spend its existing working capital and attempt to raise additional amounts as needed.

11. Capital Management – Continued

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

In order to facilitate the management of capital and development of its mineral properties, the Company's management informs the Board of Directors as to the quantum of expenditures for review and approval prior to commencement of work. In addition, the Company may issue new equity, incur additional debt, enter into joint venture agreements or dispose of certain assets. When applicable, the Company's investment policy is to hold cash in interest bearing accounts at high credit quality financial institutions to maximize liquidity. In order to maximize ongoing development efforts, the Company does not pay dividends. The Company expects to continue to raise funds, from time to time, to continue meeting its capital management objectives.

There were no changes in the Company's approach to capital management during the six months ended June 30, 2022 compared to the year ended to December 31, 2021. The Company is not subject to externally imposed capital requirements. Further information relating to management of capital is disclosed in Note 1.

12. Financial Instruments

Classification and Measurement

The Company classifies its cash, amounts receivable (excluding sales tax receivable) and reclamation bonds as financial assets measured at amortized costs. Accounts payable and accrued liabilities are classified as other financial liabilities measured at amortized cost.

As of June 30, 2022, the statement of financial position carrying amounts of these financial instruments closely approximate their fair values, except for accounts payable and accrued liabilities where the fair value may be less than carrying amounts due to liquidity risks (*Note 1*).

The Company classifies financial instruments recognized at fair value in accordance with a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

12. Financial Instruments – Continued

The following provides the valuation method of the Company's financial instruments as at June 30, 2022 and December 31, 2021:

	Level	As at June 30, 2022	As at December 31, 2021
Financial assets at amortized cost	1	\$ 1,593,687	\$ 4,721,383
Other financial liabilities at amortized cost	1	\$ 740,052	\$ 739,768

Financial Risk Management

The Company's activities expose it to a variety of financial risks including credit risk, liquidity risk and market risk.

Credit Risk - Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash, short-term investment, reclamation bonds and amounts receivable. The carrying amount of financial assets recorded in the consolidated financial statements, net of any allowances for losses, represents the maximum exposure to credit risk.

The Company deposits its cash with a high credit quality major Canadian financial institution as determined by ratings agencies. The Company does not invest in asset-backed deposits or investments and does not expect any credit losses. To reduce credit risk, the Company regularly reviews the collectability of its amounts receivable and establishes an allowance based on its best estimate of potentially uncollectible amounts. The Company historically has not had difficulty collecting its amounts receivable.

Liquidity Risk - Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company attempts to manage liquidity risk by maintaining a sufficient cash balance. As at June 30, 2022, the Company had cash of \$1,528,937 to settle current liabilities (excluding deferred share premium liability) of \$740,052. Further information relating to liquidity risk is disclosed in Notes 1 and 15.

Market Risks - The significant market risks to which the Company is exposed are currency and interest rate risks.

The operating results and financial position of the Company are reported in Canadian dollars. As the Company conducts exploration and property examinations in other countries outside of Canada, some of the Company's transactions are denominated in currencies other than the Canadian dollar. The results of the Company's operations are subject to currency transaction and translation risks. The Company has not entered into any agreements or purchased any foreign currency hedging arrangements to hedge possible currency risks at this time. Management believes the foreign exchange risk derived from currency conversions for property examinations incurred in other countries outside of Canada is not significant and therefore does not hedge its foreign exchange risk.

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company's interest rate risk arises primarily from interest earned on the short-term investment. Cash is not subject to interest rate risk since it does not bear interest.

13. Contingency

The Company is committed to making severance payments amounting to approximately \$552,000 to certain officers and directors of the Company in the event that there is a change in control. Change in control is generally defined as follows: the acquisition by any unrelated party between 30% to 50% of the Company's shares, the change of 51% or more of the directors, the sale of all or substantially all of the assets of the Company, and/or a reorganization, merger or other transaction.

14. Segmented Information

The Company conducts its business in a single operating segment: the acquisition, exploration and development of mineral properties. Although the Company has subsidiaries in Peru, it has not conducted any operations and has no assets in Peru since the year ended December 31, 2018. Accordingly, the Company's assets as at June 30, 2022 and December 31, 2021 are located in Canada and its net losses for the three and six months ended June 30, 2022 and 2021 are based on a single location which is in Canada.

15. Event After the Reporting Period

On August 24, 2022, the Company closed a non-brokered financing (the "Financing") with the issuance of 3,100,000 flow-through units (the "FT Units") at a price of \$0.15 per FT Unit and 7,166,665 non-flow-through units (the "NFT Units") at a price of \$0.12 per NFT unit (the "NFT Units") for gross proceeds of \$1,325,000.

Each FT Unit is comprised of one flow-through common share (the "FT Share") plus one-half (1/2) non-transferable share purchase warrant (the "FT Warrant") to purchase one non-flow-through common share (a "Warrant Share") at \$0.25 per Warrant Share which expires on August 24, 2023. The FT Warrants are subject to an acceleration provision.

Each NFT Unit is comprised of one common share plus one non-transferable share purchase warrant (the "NFT Warrant") to purchase a Warrant Share at \$0.20 which expires on August 24, 2023. The NFT Warrants are subject to an acceleration provision.

In connection with the closing of the Financing, the Company paid cash finder's fees in aggregate of \$88,100, and issued a total of 687,666 finder's warrants (the "Finder's Warrants") to certain finders and of the total Finder's Warrants issued, 186,000 has the same terms as the FT Warrants and 501,666 has the same terms as the NFT Warrants.
